

Dashboard Module — Color Palette & Design Tokens

The dark + teal token system used across the Dashboard module library. Every component references these

via `var(--token)` ; none hardcode palette hex. Source of truth: `../tokens.css` .

Page background `#07101f` matches the Alerts module library, so the two are visually compatible.

Surfaces

Token	Hex	Use
<code>--bg</code>	<code>#07101f</code>	App background (deepest)
<code>--nav</code>	<code>#0c1a2e</code>	Topbar / sidebar / banners
<code>--panel</code>	<code>#0e2036</code>	Drawers / panels
<code>--card</code>	<code>#11223a</code>	Cards / widgets / inputs
<code>--card2</code>	<code>#0f1e33</code>	Nested / alt card
<code>--border</code>	<code>#18304a</code>	Hairline dividers
<code>--border2</code>	<code>#1e3a56</code>	Stronger borders / control outlines

Text

Token	Hex	Use
<code>--text</code>	<code>#c2d4e8</code>	Primary text
<code>--muted</code>	<code>#5272a0</code>	Secondary / labels
<code>--dim</code>	<code>#2c4460</code>	Disabled / faint

Accent (teal = primary brand)

Token	Value	Use
<code>--teal</code>	<code>#14b8a6</code>	Primary accent / CTAs
<code>--teal-glow</code>	<code>rgba(20,184,166,.16)</code>	Active glow / tints
<code>--teal2</code>	<code>rgba(20,184,166,.12)</code>	Subtle teal wash
<code>--on-accent</code>	<code>#fff</code>	Text/glyphs on solid teal/purple/gradient fills

Severity / status

Token	Hex	+ tint
<code>--red</code>	<code>#e05050</code>	<code>--red-bg</code>
<code>--orange</code>	<code>#f47c22</code>	<code>--orange-bg</code>
<code>--yellow</code>	<code>#f5c400</code>	<code>--yellow-bg</code>
<code>--green</code>	<code>#2cc76a</code>	<code>--green-bg</code>
<code>--blue</code>	<code>#008cff</code>	<code>--blue-bg</code>
<code>--purple</code>	<code>#8c5bd8</code> / <code>--purple2</code> <code>#b388e0</code>	<code>--purple-bg</code>

Refinement tokens (additive)

`--radius(-sm/-lg/-pill)`, `--space-1..4`, `--ring` (keyboard focus), `--transition`, `--shadow-pop`, `--font-sans` (Inter), `--font-mono` (JetBrains Mono). Added for consistent spacing, focus rings and motion across the refined partials.

Widget data-viz colors

Chart/widget renderers use the named palette `SVAR` (`utils/colors.js`): teal `#14b8a6`, blue `#008cff`, purple `#8c5bd8`, orange `#f47c22`, green `#2cc76a`, red `#e05050`, yellow `#f5c400`; and the 5-step severity gradient `SEVS` (green→red) for heatmaps. `sevColor(level)` maps a severity key to a CSS var.
